

SOLUTIONS FOR CONSTRUCTION & INDUSTRY

Set to High Clearance

Intermediate Guide Posts

Ready to install 2 ply net.
Slide net under slab wire

Why Use RopeRail®?

Standalone Bolt Down System

- Every run is independent
- Straight runs only

Quick & Easy Set up

Tension or release the wire rope in seconds once the RopeRail® Posts are installed.

OSHA Compliant

- Under continuous self-test
- Meets OSHA 1926.502

Infinite Span

- A single RopeRail® System can span any distance
- Up to 650' of wire can be supplied on a single reel (provides 200' run)
- 200' run can be extended if required

Tough & Durable

- Galvanized posts
- Tractel® T-508 winch
- Durable Ø8.3 mm wire rope
- 11,250 lb breaking strain

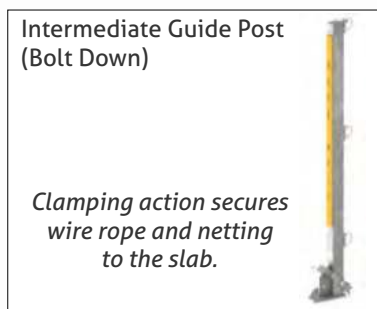

Integrated Debris Netting

- High visibility netting provides falling object protection
- 2 nets available: Full Height or High Clearance

Factory Line: 800-363-2488

ROPERAIL® POSTS

The Maximum Safety for Fall Protection

- W and T Posts incorporate sheave wheels that set the wire at the correct heights
- RopeRail® can be used in two configurations:
 - Full Height System sets the tensioned wire at these 3 heights: 45", 27", 0" (slab)
 - High Clearance System sets the tensioned wire at these 3 heights: 45", 27", 9"
- A single length of wire rope is threaded between the 2 Anchor Posts and tensioned to 2000 lb. using a Tractel® T-508 winch
- Additional Guide Posts are used at 20 foot intervals
- A spring tension gauge incorporated in the Winch Post assures correct wire tension
- Netting completes the system
- Netting slips under the slab wire and is pulled up to both sides of the wire then zip tied along the top wire - very fast to install
- Once installed RopeRail® is very strong and very safe
